October 25, 2017

Christi Keating
BASF Corporation
P.O. Box 13528, 26 Davis Drive
Research Triangle Park, NC 27709

Subject: Label Amendment – To revise the First Aid language; add a referral statement
Product Name: TC 411
EPA Registration Number: 7969-383
Application Date: September 25, 2017
Decision Number: 534213

Dear Ms. Keating:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Page 2 of 2
EPA Reg. No. 7969-383
Decision No. 534213

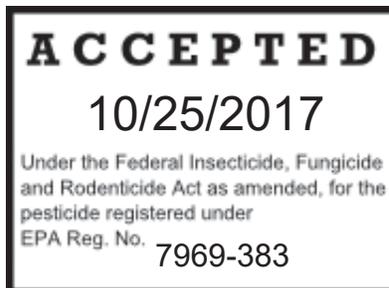

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Gene Benbow by phone at 703-347-0235, or via email at Benbow.Gene@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Venus Eagle", with a horizontal line underneath the name.

Venus Eagle, Product Manager 01

FIRST AID	
If Swallowed:	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • DO NOT induce vomiting unless told to do so by a poison control center or doctor. • DO NOT give anything by mouth to an unconscious person.
<p>Note to Physician: If serum calcium levels are elevated, treatment with Calcitonin is effective in reducing calcium to normal levels. Continue monitoring serum calcium and treat as necessary for hypercalcemia (Reference, AMA Drug Evaluations. Third Edition (1977), Chapter 16, pp. 248-251).</p> <p>Treatment for Pet Poisoning: If animal eats bait, call a veterinarian at once.</p> <p>Note to Veterinarians: Calcium Mobilizer Cholecalciferol: For animals ingesting bait, induce vomiting by using hydrogen peroxide or administration of activated charcoal with a cathartic. If clinical signs develop, treatment consisting of saline diuresis combined with the use of furosemide, corticosteroids and phosphate binders are recommended. Calcitonin or pamidronate may be needed for animals that remain hypercalcemic despite symptomatic treatments.</p>	
[HOTLINE/CONTACT] NUMBER	
In case of emergency, call [toll free] [1-800-832-HELP (4357)/alternate phone number]. Have the product container or label with you when calling a poison control center or doctor or going for treatment.	

Precautionary Statements

Hazards to Humans and Domestic Animals:

CAUTION. Harmful if swallowed. Keep away from humans, domestic animals, and pets. All handlers (including applicators) must wear gloves. Any person who retrieves carcasses, exposed bait, or bait station following application of this product must wear gloves. Wash hands with soap and water after handling bait station.

Environmental Hazards:

This product is toxic to fish, birds, and other wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon rodents or other animals that have eaten this bait. **DO NOT** apply directly to water.

Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read the entire label before using this product. Follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

Use Restrictions:

- Only use bait in bait station to control house mice. This bait station may be used [[in and around] or [within 50 feet of]] homes accessible to children and pets, consistent with all use restrictions and other requirements indicated on this label. **DO NOT** apply further than 50 feet away from home or building.

- **DO NOT** place bait station in areas where there is a possibility of contaminating food or surfaces that come into direct contact with food.

Selection of Treatment Areas:

Determine areas where house mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, or in other locations where there are signs of house mice.

To Control House Mice:**

First Placement:

1. Remove bait station from carton/bag.
2. Place bait station in a corner or along a wall or other vertical surface in an appropriate location. See **Use Restrictions** and **Selection of Treatment Areas**.

Position station so that both of the entrance holes are exposed and not blocked. If more than one bait station is used, space the stations at intervals of 6 to 12 feet in the infested area. If a bait station has not been fed from after 3 days, it may be moved to another location appropriate for controlling house mice. If bait has been removed or has become soiled or spoiled, remove residual material and reload the station with a new soft bait. See **To [Load or] Refill**. Wear gloves when performing these tasks. Maintain stations in position with bait in them for at least 15 days or as long as activity persists.

Wearing gloves, collect and dispose of all dead animals and leftover bait properly as specified on this label. To discourage re-infestation, limit sources of rodent food, water, and harborage as much as possible. If re-infestation does occur, repeat treatment.

Outer Carton/Bag Back Label {Note to PM: Bold text enclosed in “{ }” is information for the reviewer and not part of the label. [Bracketed information is optional text.] Text separated by “/” denotes and/or options.}

To [Load or] Refill: {Pictograms will be added to illustrate each step.}

You will need both hands to open the station.

1. Find the latch on the underside of the station and the top button.
2. Using one hand, pull the bottom latch fully in the direction shown by the arrow with your index finger and fully press the button on top of the station with your thumb.
3. While still pulling on the bottom latch and pressing the top button, swing the window open with your other hand.

{Registrant will select one of the two following sets of instructions to appear on the marketplace label}

{First Set:}

4. Wearing gloves, remove a new soft bait from the [bag/package/box/container], leaving the protective wrapper in place.
5. Place the new soft bait [with the [perforated/protective] wrapper] into the station ensuring that the peg goes through [the hole in]/[the center of] the soft bait. Press bait firmly into the station.
6. Close the station by swinging the window back into place until a click is heard.
7. Wash hands thoroughly.

{Second Set:}

4. Wearing gloves, place the new soft bait [with the perforated/protective wrapper] into the station ensuring that the peg goes through [the hole in]/[the center of] the soft bait. Press bait firmly into the station.
5. Close the station by swinging the window back into place until a click is heard.
6. Wash hands thoroughly.

[NOTICE TO BUYER AND USER

Buyer and user assume all responsibility for safety and risk associated with any use not in accordance with directions. **TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER’S SOLE LIABILITY AND BUYER’S AND USER’S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.]**

STORAGE AND DISPOSAL

Pesticide Storage

Store in original container in a dry place inaccessible to children and pets.

Pesticide Disposal and Container Handling

Non-refillable container. DO NOT reuse or refill this container except as described in the Directions For Use. If empty: Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place any unused product down any indoor or outdoor drain.

Conditions of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as environmental conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION (“BASF”) or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer. BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above. **TO THE EXTENT CONSISTENT WITH APPLICABLE LAW: (A) BASF MAKES NO OTHER WARRANTIES EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR PARTICULAR PURPOSE OR MERCHANTABILITY, (B) BUYER’S EXCLUSIVE REMEDY AND BASF’S AND SELLER’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT, AND (C) BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.** BASF and the Seller offer this product, and the Buyer and User accept it, subject to these **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF. {Optional Marketing Claims}

1. Active Ingredient/Efficacy/Palatability:

- Kills house mice
- Mice love it to death**
- Patented/Patent Pending formula/formulation/technology
- d-CON baits: killing mice in America for over 60 years
- *Satisfaction Guaranteed or your money back
- Kills anticoagulant-resistant house mice
- First deaths appear 3 days after feeding begins
- First kill/death on day 3
- Mice start to die at day 3
- Mice begin to die at day 3
- Mice begin to die as early as day 3
- Effective, mice die as early as day 3
- Contains denatonium benzoate (**Bitrex**[®], bittering agent)
- Guaranteed to kill* or your money back

2. Bait Station:

- Compact design
- Tamper-resistant by children/dogs
- Use indoors/outdoors
- Ready to use
- Corner Fit**[™]
- No need to touch the bait when initially placing the bait station
- Mouse enters, then feeds on bait, mouse exits, then dies later
- Window shows how much bait is left
- Can be used in compact places around the home
- Refillable bait station
- Tamper-resistant to [children][dogs][weather]
- Good for [indoor/outdoor] use
- Child/dog resistant station
- Kid and Dog Resistant [Bait] Station
- Kid & Dog Tamper Resistant [Bait Station]
- Kid and Dog Tested [Bait] Station
- Kid Tested [bait station]
- Dog resistant [bait] station
- Dog Tested [bait station]
- Durable design of [bait] station is child and dog resistant
- Child and dog resistant [bait] station
- Child, dog and weather – resistant [bait station]
- Child resistant [bait station]
- Soft bait contained in each station
- Bait Station is child (and dog) resistant
- Control house mouse problems
- For use indoors and out
- Helps reduce house mice problems

Labeling for Outer Carton/Bag Front, Back, or Side Panel Label *{Note to PM: Bold text enclosed in “{ }” is information for the reviewer and not part of the label. [Bracketed information is optional text.] Text separated by “/” denotes and/or options.}*

- Value Pack
- Child tamper-resistant [bait] station
- Clear window [for easy monitoring]
- Indoor/outdoor use
- Fits in the station without unwrapping
- No need to unwrap
- No need to touch the [bait/poison]
- Water resistant
- May be used indoors/outdoors
- Able to see if the bait is eaten through the window
- Station accommodates entry and feeding by all house mice
- All ages and sizes of house mice can enter the bait station
- Mice can access the station when it is placed flat
- Works if placed horizontally
- Works if placed flat
- Double [button/latch] locking system
- Designed for use in a variety of locations:
 - Garage
 - Basement
 - Laundry
 - Attic
 - Behind appliances
 - Kitchen
 - Mud Room
- Station comes with bait already in it
- Pre-loaded, ready-to-use bait station
- Ready to Use/Ready-to-Use Bait Station
